

## **Report for week 5 (February 6-12)**

### **Accomplishments of past week**

- Met with the May '12 Senior Design team for Google and discussed the requirements that Google gave them for their project. This allowed us to predict what requirements
- Google will give our project.
- Formulated first revision of the Project Plan.

### **Plan for coming week**

- Create a detailed list of requirements for the project.
- Formalize project organization and work schedule.

### **Pending issues**

- Client is still incommunicado, but after meeting with the other Google group, we have a much better picture of what requirements to expect; we should be able to form a rough list of requirements without input from our client.

### **Individual contributions**

- Each group member contributed to the first revision of the Project Plan.
- Each group member attended the meeting with the other Google group.
- Each group member attended the weekly meeting with Dr. Manimaran.
