

IOWA STATE UNIVERSITY

Senior Design Weekly Report

Weekly Report 17

Group: May-06

Group member: Chongli Cai, Qiaoya Cui, David Hoffman, Andrew Kom, Ailing Mei

Client: Garmin International

Advisor: Dr. Colin Christy

Period: 2/11/2013-2/17/2013

Date: 2/17/2013

Goals to Meet

Given the career fair this week, progress was slow this week. We have made it a goal to work more as a team, and help each other.

Weekly Progress

This week we worked together to help get everyone able to display the MSP430 values on the computer terminal. Additionally, we worked on our own programming of the MSP430 again.

Future Planning

Given the career fair, and a laptop the required repairs, we will focus on getting back to work, and will try to start integrating our systems together this week.

Pending Issues

Computer parts have yet to all come in for fixing David's laptop.

Individual Contributions

Andrew:

Weekly Report 17	1 hour
LCD coding and testing	2 hours

Chongli:

Continued Voltage measurement testing and programming	2 hour
---	--------

Ailing:

Continued Voltage measurement testing and programming	2 hour
---	--------

Qiaoya:

Temp Sensor testing	3 hours
PCB Studying	2 hours

David:

Helped Others with UART Communication	2 hours
