

11/4/2012

Weekly Report 10/29 - 11/4

Group: 13-17

Advisor: Prof. Somani

Client: Josh Mandich/ Venture Lights

Accomplishments:

- Worked on individual demos
- Met on Friday to go over coding with Intae

Plan for the coming week:

- Work on 2nd draft of project plan
- Eric: Work on clients with James, research image streaming
- Michael: Continue looking at motion detection software and integrating with other code
- James: Work on clients, sending images over sockets, authentication
- Intae: Continue working on C, researching PIR sensor
- David: Finish code for image filtering, start looking at localization

Pending Issues:

- Second draft of project plan is due Friday
- Should start thinking about senior design presentation

Individual Contributions:

- Eric: Network code working with James' code, should be ready for demo
- Michael: Making progress on motion detection code
- James: Client/Server code ready for demo
- David: Image filtering code ready for demo
- Intae: Sent PIR info to Eric for purchasing,
