*Thanksgiving break occurred this week from 11/22/13 until 12/01/13. Therefore, we were unable to meet this week due to everybody being out-of-state.*

*It was difficult to work on parts of the project, since we were away from the 3D printer and could not test anything that we wrote. However, Piriya put some hours into the calibration program.*

*We will continue our work next week when we can all convene and work with the printer.*
