We met with the 492 group Dec13-09 in the senior design lab to interview them and fill out the worksheet. After discussing with them, we met for our normal weekly meeting. Cody explained a new idea for how to implement the web user interface. This would have each of the modules (header, footer, search form, results, etc.) be one a single page. To change the display, various modules would be visible/invisible depending on the wanted layout. We will be meeting tomorrow (Thursday) in the TLA at 7:00 pm to get everyone's IDE working correctly with everyone's code.
